Opulence (OP) Whitepaper V1

INTRODUCTION

Opulence (meaning wealthy community) Is a decentralized cryptocurrency built on the ERC20 (Ethereum) blockchain. Delivering an all new, never seen before (in this format), overpowered (OP) AI signals scanning/audit bot. That makes huge advancements on how the space discovers bullish and safe projects, with the use of AI. We will also deliver a fast and fee crunching sniper bot that can be used by our whales to directly link to our signals Also the girlfriend/sugar mommy of Elons bot Optimus! When he accepts.

OPULENCE AI BOT

PROPRIETARY AI

Chart Pattern Recognition Analysing Chart movements, patterns and volume. Before giving it's final overall score. If a token passes it'll be graded depending how high it scored and published as a signal in our channel if self scanned.

QUALITY OVER QUANTITY

We don't want 10 signals a day if they're not all printing.
Our AI will learn and so will we, ensuring that this bot will get better and better with the signals it gives

REVENUE SHARE

Unlike others who only look for profit, our main signals channel will be freely accessible to all, meaning we build a large community and we charge devs if they want a signal.

OPULENCE AI BOT USE-CASES

Audit

Our bot will audit 2 ways, self scanning from the multiple different sources it'll be connected to or by input from dev. Using a mix of human set parameters and AI. Scoring each before giving it's overall score. Anything that doesn't pass the audit will be discounted and not posted.

AI Analysis

Analysing Chart movements, patterns and volume. Before giving it's final overall score. If a token passes it'll be graded depending how high it scored and published as a signal in our channel if self scanned.

AI Signals

Our Signals will be graded and published in 2 ways. There will be the bots own self scanned signals and there will be paid signals that have passed an audit from a dev or investor scanning it.

Promotion

If a dev or investor has scanned a project and it passes our audit they will be offered the option to pay for the signal to go out. They will also be offered a full post promotion in our channel, my call channel and a wider package including other calllers.

Sniper

We will deliver a fast and fee crunching sniper bot that can be used by our whales to directly link to our signals, meaning all you do is fund your wallet, set which tier of signal you want it to buy and other parameters such as how many X to sell on etc and let the bot do the rest.

Whale benefits

A whale will be deemed as a holder of 0.5% or more supply.
✅ Access to our signals 5 mins before the public channel.
✅ 50% revenue share.
✅ Ablity to use our sniper to auto snipe which tier of signals you desire.
✅ 1st access to our prototype.

GOALS AND VISION

An all new AI Bot (@Opulence_AI_Audited_Signals) that will revolutionise how we as investors and call channel owners search for and invest/call solid projects. Helping us cut out the rugs and the dying tokens just looking for exit liquidity. As a call channel owner myself this is the hardest thing and you'll see I call very little. The success of a call channel is down to the success of the calls made. Making sure our subs are not losing. I have many parameters that form my decision on whether to call and ape a project. Given I haven't called a rug or scam for a long time now and most of my calls are printing 5/10/20X I'd say those parameters are serving well.

I'm going to be implementing these into a TG bot, the bot will be connected to several sources such as Etherscan, Dextools live pairs alerts, Call analyser etc. It will also asess the chart of the token and it's recent high and lows, being able to make its own decisions on the current trend of the chart. It will automatically assess any contract posted at it's connected sources, the bot can assess a token on my set of criteria and score it overall. Any that score less than 50 don't make the cut, then they're graded by score 50-70 = Bullish, 70-90 = Mega Bullish and 90+ = Giga Bullish. Then the bot will post the signals in our public channel.

All signals will be posted 5mins early in the private channel, accessible to holders of 0.5% or more and any caller who has called our project.

FOR CALL CHANNEL OWNERS

YOU CAN USE THIS BOT TO FIND QUALITY, SAFE PROJECTS TO CALL TO FILL CONTENT IF THEY'VE NOT GOT PAID CALLS TO POST. THEY CAN ALSO SIGN UP TO OUR CALLS PACKAGE WHERE MEGA OR GIGA SIGNALS WILL BE OFFERED THE CALL PACKAGE INCLUDING @GOAT_GEMS CREATING A PAID STRIKE PACKAGE OF CALLS FOR THE MOST BULLISH PROJECTS.

FOR DEVS/INVESTORS

THEY WILL BE ABLE TO SCAN THEIR PROJECT INTO THE BOT AND IT WILL RUN ITS ANALYSIS AND DECIDE IF ITS BULLISH ENOUGH (SCORE 50+) TO POST IN OUR CHANNEL. IF IT IS THEY WILL RECEIVE A CONGRATS MESSAGE BACK AND BE ASKED TO PAY A SMALL AMOUNT $50 INITIALLY FOR THE SIGNAL TO GO OUT. AS WE GROW THE CHANNEL CHANGES WILL INCREASE.

THE MEGA AND GIGA SIGNALS WILL ALSO BE OFFERED A FULL POST CALL WITH @GOAT_GEMS OR OUR STRIKE PACKAGE WITH OTHER CALLERS.

AS WE RECEIVE THE SIGNALS FROM THE BOT THEY WILL BE MONITORED ON THEIR PERFORMANCE AND WE WILL ADJUST THE SCORE AS NEEDED TO ENSURE WE ARE HITTING A CRAZY HIGH SUCCESS RATE. MAYBE THERE WILL BE 10 SIGNALS A DAY MAYBE JUST 2 BUT WE WILL FINE TUNE IT SO AS IT HAS A NEAR 100% SUCCESS RATE

BUT THAT'S NOT ALL! OUR PLATFORM WILL BECOME A BULLISH MEDIA OUTLET, CONSISTENTLY PUBLISHING BULLISH CRYPTO NEWS POSTS FROM WEB AND SOCIAL MEDIA, DRAWING REGULAR USERS. WE WILL GIVE ANY PROJECT THAT'S POSTED BY OUR BOT THE OPTION TO PAY TO LIST ON THE PLATFORM (KIND OF LIKE CMC) WITH THE BOT ACTING AS THE 1ST POINT OF CHECKS ALLOWING ONLY THE BEST PROJECTS TO LIST, THERE WILL BE A CHARGE FOR THIS THAT'LL GIVE THEM A FULL CALLS AND TRENDING/BANNER ADS PACKAGE.

Tokenomics

We are not here to take part with this, we are here to constantly improve and perfect. We are here to change how the space (including callers) find, invest in and promote tokens .

We don't want to hinder our growth or further development in our quest to produce the best! So in-line with other projects that are offering a less functional product. We have choosen 4/4 tax, a low amount that still enables us to do some solid marketing and the development we want. Meaning we deliver a 1st class product that simply blows the others away and has you all making money while you sleep.
